

Cookies used on this Website

This website, like many others, uses Cookies to improve the speed and accessibility of the visitors using it. They do not record any personal information and in almost all cases end when you leave this Website. These Cookies are called Session Cookies that last the duration of your Website visit, that leave no Cookie software code on your PC, Smart Phone or Tablet device.

If you use a login procedure to access one of our Websites, a Cookie will allow you to 'remember you' to save you having to type in your password and or your user name the next time you visit. This is purely for speed and your convenience, which you can choose not to do of course.

Most computers are set to accept Cookies as in most cases they are designed to help Website visitors. However, they can be turned off and or deleted if necessary.
